-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 23 September 2008.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1, 4-6, 9, 10 and 13-33 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1, 4-6, 9, 10, 13-33 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.

DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Claims 1, 4-6, 9-10, 13-339 are rejected under 35 U.S.C. 103(a) as being unpatentable over Bergsbaken et al in view of Ruben. The patent to Bergsbaken et al teaches structure substantially as claimed including a cover(10), made of a non woven material (columns 3, lines 63-67, column 4, lines 1-13, The use of nonwovens, films, polyesters would have included the use of vinyls), folds and side drops, connection structure including adhesives, bonding (column 4, lines 46-55) the only difference being that the connection structure is a separate piece of material. However, the patent to Ruben teaches the use of providing a folded cover with attaching structure as a unitary one piece member. It would have been obvious at the time of the invention to modify the structure of Bergsbaken et al to include a cover of a unitary construction, as taught

by Ruben since such structures are conventional alternative structures used in the same intended purpose, thereby providing structure as claimed. The methods would have been obvious in view of the structures. It is noted that Bergsbaken et al teaches the use of permanent joining through conventional structures including taping, sewing, gluing, heat seaming, ultra-sonic bonding. It is repeated that with respect to the amendments to the claims, it is unclear how the expression "where the free edges of the plurality of side drops and the plurality of pre-fitted corners together define a generally polygonal contour having a shape and dimension substantially identical to a shape and dimensions of the generally polygonal contour of the top cover" define structure other than that of the references used and therefore the preceding rejections are again made. Applicant discusses the shape and dimensions causing the film to be fitted about the sides of a tabletop to hold the cover. It is suggested that the applicant better define the "holding structure". With respect to this comment, it appears that the shape and material somewhat define the "holding structure".

Response to Arguments

Applicant's arguments filed 09/23/08 have been fully considered but they are not persuasive. See above remarks.
